

Sports Manager

An essential resource for journalistic work on sports events.

Sports Manager is a specific product for sports events, that includes both the back-office and the graphics publishing components. It is an essential resource for journalistic work. By predefining the structure of a sports competition, all you need to do is enter the sports results, each game. Sports Manager then automatically calculates or simulates all the sports event-related information and makes it available for immediate publishing.

Apart from simplifying the information and data management, this tool automates the connection between the statistical and the graphical elements to be broadcasted.

This application allows data to be collected from external sources, or directly from the event venue, using Live Sports Pack (from InfoStudio range of products).

Simultaneously Sports Manager stores the collected data so that it can be used in multiple media channels.

Sports Manager is intuitive and easy to use. It also simplifies the information collection and communication process during the several types of sports championships and competitions.

TOOLS

Charts and tables

- standings
- fixture results table
- fixture schedule

Match
